

Hopkinton Main Street Corridor Project

Project Update

July 21, 2022 UPDATE

Pavement striping has been completed ahead of schedule. An additional crew was brought in last night in order to complete the pavement marking in one day. All work was completed. There will be no night work on Thursday, July 21.

Emergency Pavement Marking Scheduled (Wednesday, July 20 and Thursday, July 21)

Emergency pavement marking has been scheduled **at night from 8pm to 4am** on Wednesday, July 20 and Thursday, July 21 to stripe the new pavement on Main Street between Wood Street and the Fire Station. Getting pavement markings down after new pavement has been installed is essential for roadway safety, especially at night. As such, public safety approved the work to take place since it will be a safety issue if the new pavement is not striped as soon as possible.

The Department of Public Works does this same type of work at night every year and before every Marathon.

This work was originally scheduled to take place during the day, Wednesday and Thursday, but the Town was notified by MassDOT that the original scheduled day work was canceled. No other MassDOT approved contractor was available to do this work during the day on such short notice.

The work on Wednesday night will be for layout and preparations and Thursday night will be for painting. No detours are planned but the Pleasant Street detour may be utilized Thursday night, if necessary. MassDOT has been informed that noise shall be mitigated as much as possible.

Police details will be onsite to assist with traffic flow and access to/or exit from driveways. The paint dries very quickly so the wait to enter/exit a driveway is minimal, estimated not to exceed five minutes.
